# HOSPITAL DISASTER MANAGEMENT

## BASIC COURSE FOR HEALTH CARE PROFESSIONALS

Disasters don't wait—neither should preparedness. In the complex and fast-moving landscape of healthcare and institutional operations, a well-prepared internal response capability is not optional but essential. This Internal Disaster Preparedness Workshop is designed to equip staff, leadership, and support teams with the knowledge, skills, and confidence to respond swiftly and effectively when the unexpected strikes. Join us in strengthening our institutional resilience: let's be ready not just to respond, but to lead when emergencies come.
